

EXHIBIT 7

IN THE UNITED STATES BANKRUPTCY COURT
FOR THE DISTRICT OF DELAWARE

In re:) Chapter 11
W. R. GRACE and CO., et al.,)
Debtors.) Case No. 01-01139 (JKF)
) Jointly Administered
)
)

**W. R. Grace
Asbestos Personal Injury
Questionnaire**

10315607073538

000797073538

YOU HAVE RECEIVED THIS QUESTIONNAIRE BECAUSE GRACE BELIEVES THAT YOU HAD SUED ONE OR MORE OF THE DEBTORS LISTED IN APPENDIX A ATTACHED TO THIS QUESTIONNAIRE BEFORE GRACE FILED FOR BANKRUPTCY ON APRIL 2, 2001 FOR AN ASBESTOS-RELATED PERSONAL INJURY OR WRONGFUL DEATH CLAIM, AND THAT CLAIM WAS NOT FULLY RESOLVED.

IF YOU HAVE SUCH A CLAIM, YOU MUST COMPLETE AND SUBMIT THIS QUESTIONNAIRE BY JANUARY 12, 2006 TO RUST CONSULTING, INC., THE CLAIMS PROCESSING AGENT, AT ONE OF THE FOLLOWING ADDRESSES:

IF SENT BY U.S. MAIL

RUST CONSULTING, INC.
CLAIMS PROCESSING AGENT
RE: W.R. GRACE and CO. BANKRUPTCY
P.O. BOX 1620
FAIRBAULT, MN 55021

**IF SENT BY FEDERAL EXPRESS, UNITED PARCEL
SERVICE, OR A SIMILAR HAND DELIVERY SERVICE**

RUST CONSULTING, INC.
CLAIMS PROCESSING AGENT
RE: W.R. GRACE and CO. BANKRUPTCY
201 S. LYNDAL AVE.
FAIRBAULT, MN 55021

A QUESTIONNAIRE (AND ANY AMENDMENTS OR ADDITIONAL DOCUMENTS IN SUPPORT OF THE QUESTIONNAIRE) WILL NOT BE CONSIDERED UNLESS RECEIVED BY RUST CONSULTING, INC. BY JANUARY 12, 2006.

THIS QUESTIONNAIRE IS AN OFFICIAL DOCUMENT APPROVED BY THE COURT IN CONNECTION WITH ESTIMATING GRACE'S ASBESTOS-RELATED PERSONAL INJURY AND WRONGFUL DEATH CLAIMS AS A WHOLE. THE QUESTIONNAIRE IS BEING USED BY W. R. GRACE AS A MEANS TO SEEK INFORMATION ABOUT YOUR ASBESTOS CLAIM. BY TIMELY RETURNING THE QUESTIONNAIRE AS COMPLETELY AND ACCURATELY AS POSSIBLE, GRACE, THE OFFICIAL COMMITTEES, AND THE FUTURE CLAIMANTS REPRESENTATIVE WILL SEEK TO PRIORITIZE THE PROCESSING OF YOUR CLAIM UNDER ANY TRUST DISTRIBUTION PROCEDURES APPROVED AS PART OF A PLAN OF REORGANIZATION.

THE COURT HAS ORDERED THAT, AS PART OF THE DISCOVERY PROCESS, ALL HOLDERS OF PRE-PETITION ASBESTOS PERSONAL INJURY CLAIMS MUST COMPLETE AND RETURN THIS QUESTIONNAIRE. THUS, FAILURE TO TIMELY RETURN THE QUESTIONNAIRE AS COMPLETELY AND ACCURATELY AS POSSIBLE MAY RESULT IN SANCTIONS AND/OR OTHER RELIEF AVAILABLE UNDER APPLICABLE FEDERAL RULES.

BECAUSE YOUR CLAIM WILL BE EVALUATED IN ACCORDANCE WITH THE TRUST DISTRIBUTION PROCEDURES APPROVED AS PART OF A PLAN OF REORGANIZATION, COMPLETION OF THIS QUESTIONNAIRE DOES NOT MEAN THAT YOUR CLAIM WILL EITHER BE ALLOWED OR PAID. TO THE EXTENT YOU ATTACH TO THIS QUESTIONNAIRE DOCUMENTS ALSO NEEDED BY THE TRUST TO PROCESS YOUR CLAIM, SUCH DOCUMENTS WILL BE PROVIDED TO THE TRUST AND YOU WILL NOT NEED TO RESUBMIT THEM.

WR GRACE PIQ 39048-0002

INSTRUCTIONS**A. GENERAL**

1. This Questionnaire refers to any lawsuit that you filed before April 2, 2001 for an "asbestos-related personal injury or wrongful death claim." This term is intended to cover any lawsuit alleging any claim for personal injuries or damages that relates to: (a) exposure to any products or materials containing asbestos that were manufactured, sold, supplied, produced, specified, selected, distributed or in any way marketed by one or more of the Debtors (or any of their respective past or present affiliates, or any of the predecessors of any of the Debtors or any of their respective past or present affiliates), or (b) exposure to vermiculite mined, milled or processed by the Debtors (or any of their respective past or present affiliates). It includes claims in the nature of or sounding in tort, or under contract, warranty, guarantee, contribution, joint and several liability, subrogation, reimbursement, or indemnity, or any other theory of law or equity, or admiralty for, relating to, or arising out of, resulting from, or attributable to, directly or indirectly, death, bodily injury, sickness, disease, or other personal injuries or other damages caused, or allegedly caused, directly or indirectly, and arising or allegedly arising, directly or indirectly, from acts or omissions of one or more of the Debtors. It includes all such claims, debts, obligations or liabilities for compensatory damages such as loss of consortium, personal or bodily injury (whether physical, emotional or otherwise), wrongful death, survivorship, proximate, consequential, general, special, and punitive damages.
2. Your Questionnaire will be deemed filed only when it has been received by Rust Consulting Inc., the Claims Processing Agent, via U. S. Mail, Federal Express, United Parcel Service or a similar hand delivery service. A Questionnaire that is submitted by facsimile, telecopy or other electronic transmission will not be accepted and will not be deemed filed. Do not send any Questionnaire to the Debtors, counsel for the Debtors, the Future Claimants Representative, the Official Committee of Unsecured Creditors, the Official Committee of Asbestos Personal Injury Claimants, the Official Committee of Asbestos Property Damage Claimants, the Official Committee of Equity Security Holders, or such Committees' counsel. Questionnaires that are filed with or sent to anyone other than Rust Consulting, Inc. will be deemed not to have been submitted, and such Questionnaires will not be considered.
3. Your completed Questionnaire must (i) be written in English, and (ii) attach relevant supporting materials as instructed further below.
4. All holders of claims described on page i (and as described in further detail in Instruction A (1) above) are required to file this Questionnaire by Jan. 12, 2006. Your Questionnaire will be used in connection with the estimation hearing to be conducted by the Court pursuant to the Estimation Procedures Order (a copy of which is attached as Appendix B).
5. Any subsequent amendment to the Questionnaire will not be considered for any purpose unless received by Jan. 12, 2006.

B. PART I -- Identity of Injured Person and Legal Counsel

Respond to all applicable questions. If you are represented by a lawyer, then in Part I (b), please provide your lawyer's name and the name, telephone number and address of his/her firm. If you are represented by a lawyer, he/she must assist in the completion of this Questionnaire. Also, if you would prefer that the Debtors send any additional materials only to your lawyer, instead of sending such materials to you, then check the box indicating this in Part I (b).

All references to "you" or the like in Part I through X shall mean the injured person. If the injured person is deceased, then the executor of the person's will (or similar estate representative) must complete this Questionnaire.

C. PART II -- Asbestos-Related Condition(s)

Please indicate all asbestos-related medical conditions for which you have been diagnosed. To complete questions related to injuries, medical diagnoses, and/or conditions, please use the following categories of customarily diagnosed conditions:

- * Mesothelioma
- * Asbestos-Related Lung Cancer
- * Other Cancer (colon, laryngeal, esophageal, pharyngeal, or stomach)
- * Clinically Severe Asbestosis
- * Asbestosis
- * Other Asbestos Disease

If you have been diagnosed with multiple conditions and/or if you received diagnoses and diagnostic tests relating to the same condition by multiple doctors, please complete a separate Part II for each initial diagnosis and any previous or subsequent diagnoses or diagnostic tests that change or conflict with the initial diagnosis. For your convenience, additional copies of Part II are attached as Appendix C to this Questionnaire.

Supporting Documents for Diagnosis: This Questionnaire must be accompanied by copies, with access to originals upon request, of any and all documents you, your counsel, or your doctors have or subsequently obtain that support or conflict with your diagnosis.

X-rays and B-reads: Please attach all x-ray reading and reports. You may, but are not required to, attach chest x-rays. The Court, however, has ruled that Grace may seek access to chest x-rays upon request.

Pulmonary Function Tests: Please attach all pulmonary function test results, including the actual raw data and all spirometric tracings, on which the results are based.

WR GRACE PIQ 39046-0003

D. PART III -- Direct Exposure to Grace Asbestos-Containing Products

In Part III, please provide the requested information for the job and site at which you were exposed to Grace asbestos-containing products. Indicate the dates of exposure to each Grace asbestos-containing product. If your exposure was a result of your employment, use the list of occupation and industry codes below to indicate your occupation and the industry in which you worked at each site. If you allege exposure to Grace asbestos-containing products at multiple sites, the Court has ordered that you must complete a separate Part III for each site. For your convenience, additional copies of Part III are attached as Appendix D to this Questionnaire.

Attach copies of any and all documents establishing that exposure to Grace asbestos-containing products had a substantial causal role in the development of the disease.

Occupation Codes

- | | |
|--|---|
| 01. Air conditioning and heating installer/maintenance | 31. Iron worker |
| 02. Asbestos Miner | 32. Joiner |
| 03. Asbestos plant worker/asbestos manufacturing worker | 33. Laborer |
| 04. Asbestos removal/abatement | 34. Longshoreman |
| 05. Asbestos sprayer/spray gun mechanic | 35. Machinist/machine operator |
| 06. Assembly line/factory/plant worker | 36. Millwright/mill worker |
| 07. Auto mechanic/bodywork/brake repairman | 37. Mixer/bagger |
| 08. Boilermaker | 38. Non-asbestos miner |
| 09. Boiler repairman | 39. Non-occupational/residential |
| 10. Boiler worker/cleaner/inspector/engineer/installer | 40. Painter |
| 11. Building maintenance/building superintendent | 41. Pipefitter |
| 12. Brake manufacturer/installer | 42. Plasterer |
| 13. Brick mason/layer/hod carrier | 43. Plumber - install/repair |
| 14. Bumer operator | 44. Power plant operator |
| 15. Carpenter/woodworker/cabinetmaker | 45. Professional (e.g., accountant, architect, physician) |
| 16. Chipper | 46. Railroad worker/carman/brakeman/machinist/conductor |
| 17. Clerical/office worker | 47. Refinery worker |
| 18. Construction - general | 48. Remover/installer of gaskets |
| 19. Custodian/janitor in office/residential building | 49. Rigger/stevedore/seaman |
| 20. Custodian/janitor in plant/manufacturing facility | 50. Rubber/tire worker |
| 21. Electrician/inspector/worker | 51. Sandblaster |
| 22. Engineer | 52. Sheet metal worker/sheet metal mechanic |
| 23. Firefighter | 53. Shipfitter/shipwright/ship builder |
| 24. Fireman | 54. Shipyard worker (md. repair, maintenance) |
| 25. Flooring installer/tile installer/tile mechanic | 55. Steamfitter |
| 26. Foundry worker | 56. Steelworker |
| 27. Furnace worker/repairman/installer | 57. Warehouse worker |
| 28. Glass worker | 58. Welder/blacksmith |
| 29. Heavy equipment operator (includes truck, forklift, crane) | 59. Other |
| 30. Insulator | |

Industry Codes

| 106. Maritime | 117. Non-Grace asbestos manufacture or milling |
| 107. Military (other than U.S. Navy) | 118. Other |
| 108. Non-asbestos products manufacturing | |

E. PART IV -- Indirect Exposure to Grace Asbestos-Containing Products

In Part IV, please provide the information requested for any injury alleged to have been caused by exposure to Grace asbestos-containing products through contact/proximity with another injured person. If you allege exposure through contact/proximity with multiple injured persons, please complete a separate Part IV for each injured person. For your convenience, additional copies of Part IV are attached as Appendix E to this Questionnaire.

F. PART V -- Exposure to Non-Grace Asbestos-Containing Products

In Part V, please provide the requested information for each party against which you have filed a lawsuit and/or claim alleging exposure to asbestos-containing products other than Grace products. If you filed such lawsuits and/or claims against multiple parties, the Court has ordered that you must complete a separate Part V for each party. If exposure was in connection with your employment, use the list of occupation and industry codes in Part III to indicate your occupation and the industry in which you worked. For your convenience, additional copies of Part V are attached as Appendix F to this Questionnaire.

G. PART VI -- Employment History

In Part VI, please provide the information requested for each industrial job you have held, other than jobs already listed in Part III or V. Use the list of occupation and industry codes in the instructions to Part III to indicate your occupation and the industry in which you worked each job. Please use the copy of Part VI attached as Appendix G to this Questionnaire if additional space is needed.

H. PART VII -- Litigation and Claims Regarding Asbestos and/or Silica

In Part VII, please describe any lawsuits and/or claims that were filed by you or on your behalf regarding asbestos or silica.

I. PART VIII -- Claims by Dependents or Related Persons

Part VIII is to be completed only by dependents or related persons (such as spouse or child) of an injured person who sued the Debtors before April 2, 2001 for an asbestos-related personal injury or wrongful death claim against Grace not involving physical injury to him-/herself on account of his/her own exposure. One example of such a claim would be a claim for loss of consortium. If you are asserting such a claim, complete the entire Questionnaire, providing all information and documentation regarding the injured person.

J. PART IX -- Supporting Documentation

In Part IX, please mark the boxes next to each type of document that you are submitting with this Questionnaire. As indicated in the instructions to Parts II and III, this Questionnaire must be accompanied by copies, with access to originals upon request, of any and all documents you, your counsel, or your doctors have or subsequently obtain that (a) support or conflict with your diagnosis and/or (b) establish exposure to Grace asbestos-containing products as having a substantial causal role in the development of the medical diagnoses, and/or conditions claimed. Original documents provided to Grace will be returned within a reasonable time after its professionals and experts have reviewed the documents.

Grace will reimburse your reasonable expenses incurred in providing (a) copies of depositions you have given in lawsuits in which Grace was not a party and/or (b) any documents you have previously provided to Grace in prior litigation. Please indicate the documents for which you are seeking reimbursement and attach a receipt for such cost.

K. PART X -- Attestation that Information is True, Accurate and Complete

By signing Part X, you, the injured person, are attesting and swearing, under penalty of perjury, that, to the best of your knowledge, all of the information in this Questionnaire is true, accurate and complete. If the injured person is deceased, then the executor of the person's will (or similar estate representative) must complete and sign Part X on behalf of the injured person.

The legal representative of the injured person must complete and sign Part X where indicated.

- REDACTED**

PART II: ASBESTOS-RELATED CONDITIONS

1

REC'D JUL 12 2006

PART III: ASBESTOS-RELATED CONDITION(S) (Continued)

b. **Asbestos-Related Lung Cancer:** If alleging Asbestos-Related Lung Cancer, were you diagnosed with primary lung cancer based on the following (check all that apply):

- ☐ findings by a pathologist certified by the American Board of Pathology
- ☐ evidence of asbestosis based on a chest x-ray reading of at least 1/1 on the ILO grade scale (a) conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses and (b) by a B-reader certified by the National Institute for Occupational Safety and Health
- ☐ evidence of asbestosis based on chest x-ray reading of at least 1/1 on the ILO grade scale (a) conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses and (b) by a second B-reader certified by the National Institute for Occupational Safety and Health
- ☐ evidence of asbestosis determined by pathology
- ☐ evidence of asbestos-related nonmalignant disease based on a chest x-ray reading of at least 1/0 on the ILO grade scale (a) conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses and (b) by a B-reader certified by the National Institute for Occupational Safety and Health.
- ☐ evidence of asbestos-related nonmalignant disease based on a chest x-ray reading of at least 1/0 on the ILO grade scale (a) conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses and (b) by a second B-reader certified by the National Institute for Occupational Safety and Health.
- ☐ diffuse pleural thickening as defined in the International Labour Organization's Guidelines for the Use of the ILO International Classification of Radiographs and Pneumoconioses (2000)
- ☐ a supporting medical diagnosis and supporting documentation establishing that exposure to Grace asbestos-containing products had a substantial causal role in the development of the lung cancer
- ☐ other (please specify): _____

c. **Other Cancer:**

(i) If alleging Other Cancer, please mark the box(es) next to the applicable primary cancer(s) being alleged:

- ☐ Colon

 ☐ Pharyngeal

 ☐ Esophageal

 ☐ Laryngeal

 ☐ Stomach
☐ Other, please specify: _____

(ii) Were you diagnosed with the above-indicated cancer based on the following (check all that apply):

- ☐ findings by a pathologist certified by the American Board of Pathology
- ☐ evidence of asbestosis based on a chest x-ray reading of at least 1/1 on the ILO grade scale (a) conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses and (b) by a B-reader certified by the National Institute for Occupational Safety and Health
- ☐ evidence of asbestosis based on chest x-ray reading of at least 1/1 on the ILO grade scale (a) conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses and (b) by a second B-reader certified by the National Institute for Occupational Safety and Health
- ☐ evidence of asbestosis determined by pathology
- ☐ a supporting medical diagnosis and supporting documentation establishing that exposure to Grace asbestos-containing products had a substantial causal role in the development of the cancer
- ☐ other (please specify): _____

PART II- ASBESTOS-RELATED CONDITION(S) (Continued)

- d. **Clinically Severe Asbestosis:** If alleging Clinically Severe Asbestosis, was your diagnosis based on the following (check all that apply):
- ☐ diagnosis of a pulmonologist or internist certified by the American Board of Internal Medicine
 - ☐ a chest x-ray reading of at least 2/1 on the ILO grade scale (a) conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses and (b) by a B-reader certified by the National Institute for Occupational Safety and Health
 - ☐ a chest x-ray reading of at least 2/1 on the ILO grade scale (a) conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses and (b) by a second B-reader certified by the National Institute for Occupational Safety and Health
 - ☐ asbestosis determined by pathology
 - ☐ a pulmonary function test, conducted in accordance with the standard set forth in the American Thoracic Society's Lung Function Testing; Selection of Reference Values and Interpretive Strategies, demonstrating total lung capacity less than 65% predicted
 - ☐ a pulmonary function test, conducted in accordance with the standard set forth in the American Thoracic Society's Lung Function Testing; Selection of Reference Values and Interpretive Strategies, demonstrating forced vital capacity less than 65% predicted and a FEV1/FVC ratio greater than or equal to 65% predicted
 - ☐ a supporting medical diagnosis and supporting documentation establishing that exposure to Grace asbestos-containing products had a substantial causal role in the development of the lung cancer
 - ☐ other (please specify): _____
- e. **Asbestosis:** If alleging Asbestosis, was your diagnosis based on the following (check all that apply):
- ☐ diagnosis of a pulmonologist or internist certified by the American Board of Internal Medicine
 - ☐ a chest x-ray reading conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses by a B-reader certified by the National Institute for Occupational Safety and Health, with one of the following: (i) at least 1/0 on the ILO grade scale, or (ii) diffuse pleural thickening as defined in the ILO's Guidelines for the Use of the ILO International Classification of Radiographs and Pneumoconioses (2000)
 - ☐ a chest x-ray reading conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses by a second B-reader certified by the National Institute for Occupational Safety and Health, with one of the following: (i) at least 1/0 on the ILO grade scale, or (ii) diffuse pleural thickening as defined in the ILO's Guidelines for the Use of the ILO International Classification of Radiographs and Pneumoconioses (2000)
 - ☐ asbestosis determined by pathology
 - ☐ a pulmonary function test, conducted in accordance with the standard set forth in the American Thoracic Society's Lung Function Testing; Selection of Reference Values and Interpretive Strategies, demonstrating a FEV1/FVC ratio greater than or equal to 65% predicted with either (a) total lung capacity less than 80% predicted or (b) forced vital capacity less than 80% predicted
 - ☐ a supporting medical diagnosis and supporting documentation establishing that exposure to Grace asbestos-containing products had a substantial causal role in the development of the lung cancer
 - ☐ other (please specify): _____

PART II: ASBESTOS-RELATED CONDITION(S) (Continued)

f. **Other Asbestos Disease:** If alleging any asbestos-related injuries, medical diagnoses, and/or conditions other than those above, was your diagnosis based on one of the following (check all that apply):

- ☐ diagnosis of a pulmonologist or internist certified by the American Board of Internal Medicine
- ☐ diagnosis determined by pathology
- ☐ a chest x-ray reading conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses by a B-reader certified by the National Institute for Occupational Safety and Health, with one of the following: (i) at least 1/0 on the ILO grade scale, or (ii) diffuse pleural thickening as defined in the ILO's Guidelines for the Use of the ILO International Classification of Radiographs and Pneumoconioses (2000)
- ☐ a chest x-ray reading conducted in compliance with the standards set forth in the International Labour Organization's 2000 International Classification of Radiographs of Pneumoconioses by a second B-reader certified by the National Institute for Occupational Safety and Health, with one of the following: (i) at least 1/0 on the ILO grade scale, or (ii) diffuse pleural thickening as defined in the ILO's Guidelines for the Use of the ILO International Classification of Radiographs and Pneumoconioses (2000)
- ☐ a chest x-ray reading other than those described above
- ☐ a pulmonary function test, conducted in accordance with the standards set forth in the American Thoracic Society's Lung Function Testing; Selection of Reference Values and Interpretive Strategies, demonstrating a FEV1/FVC ratio greater than or equal to 65% predicted with either (a) total lung capacity less than 80% predicted or (b) forced vital capacity less than 80% predicted
- ☐ a pulmonary function test other than those described above
- ☐ a supporting medical diagnosis and supporting documentation establishing that exposure to Grace asbestos-containing products had a substantial causal role in the development of the condition
- ☐ a CT Scan or similar testing
- ☐ a diagnosis other than those above
- ☐ other (please specify): _____

PART H: ASBESTOS-RELATED CONDITION(S) (Continued)

With respect to your relationship to the doctor or clinician who performed the pulmonary function test check all applicable boxes:

If the test was performed by a doctor, was the doctor your personal physician? ☐ Yes ☐ No

Was the testing doctor and/or clinician paid for the services that he/she performed? ☐ Yes ☐ No

If yes, please indicate who paid for the services performed: _____

Did you retain counsel in order to receive any of the services performed by the testing doctor or clinician? ☐ Yes ☐ No

Was the testing doctor or clinician referred to you by counsel? ☐ Yes ☐ No

Are you aware of any relationship between the reader and your legal counsel? ☐ Yes ☐ No

If yes, please explain: _____

Was the reader certified as a pulmonologist or internist by the American Board of Internal Medicine at the time of the pulmonary function test? ☐ Yes ☐ No

With respect to your relationship to the doctor interpreting the results of the pulmonary function test check all applicable boxes:

Was the doctor your personal physician? ☐ Yes ☐ No

Was the doctor paid for the services that he/she performed? ☐ Yes ☐ No

If yes, please indicate who paid for the services performed: _____

Did you retain counsel in order to receive any of the services performed by the doctor? ☐ Yes ☐ No

Was the doctor referred to you by counsel? ☐ Yes ☐ No

Are you aware of any relationship between the doctor and your legal counsel? ☐ Yes ☐ No

If yes, please explain: _____

Was the doctor interpreting the pulmonary function test results certified as a pulmonologist or internist by the American Board of Internal Medicine at the time the test results were reviewed? ☐ Yes ☐ No

6. Information Regarding Pathology Reports: Per F.R.C.P. 33(d), See Attached Path Results

Date of Pathology Report: _____ / _____ / _____

Name of Doctor Issuing Report: _____

Doctor's Specialty: _____

Doctor's Mailing Address: _____

Doctor's Daytime Telephone Number: _____ (_____) _____ - _____

With respect to your relationship to the doctor issuing the pathology report, check all applicable boxes:

Was the doctor your personal physician? ☐ Yes ☒ No

Was the doctor paid for the services that he/she performed? ☒ Yes ☐ No

If yes, please indicate who paid for the services performed Claimant

Did you retain counsel in order to receive any of the services performed by the doctor? ☐ Yes ☒ No

Was the doctor referred to you by counsel? ☒ Yes ☐ No

Are you aware of any relationship between the doctor and your legal counsel? ☐ Yes ☒ No

If yes, please explain: _____

Was the doctor certified as a pathologist by the American Board of Pathology at the time of diagnosis ☐ Yes ☐ No

PART II: ASBESTOS-RELATED CONDITION(S) (Continued)

7. With respect of the condition alleged, have you received medical treatment from a doctor for the condition

Per F.R.C.P. 33(d), see attached documentation ☐ Yes ☐ No

If yes, please complete the following:

Name of Treating Doctor: _____

Treating Doctor's Specialty: _____

Treating Doctor's Mailing Address: _____

Treating Doctor's Daytime Telephone Number: _____ (_____) _____ - _____

Was the doctor paid for the services that he/she performed: ☒ Yes ☐ No

If yes, please indicate who paid for the services performed: Claimant

Did you retain counsel in order to receive any of the services performed by the doctor? ☐ Yes ☒ No

[REMAINDER OF PAGE INTENTIONALLY BLANK]

PART III: DIRECT EXPOSURE TO GRACE ASBESTOS-CONTAINING PRODUCTS

Please complete the chart below for each site at which you allege exposure to Grace asbestos-containing products. If you allege exposure at multiple sites, the Count has ordered that you must complete a separate chart for each site. For your convenience, additional copies of Part III are attached as Appendix D to this Questionnaire.

If exposure was in connection with your employment, use the list of occupations and industry codes in the Instructions to Part III to indicate your occupation and the industry in which you worked.

In the "Nature of Exposure" column, for each job listed, please indicate the letter(s) corresponding to whether you were any of the following during your exposure:

- (a) A worker who personally mixed Grace asbestos-containing products
 (b) A worker who personally removed or cut Grace asbestos-containing products
 (c) A worker who personally installed Grace asbestos-containing products
 (d) A worker at a site where Grace asbestos-containing products were being installed, mixed, removed or cut by others
 (e) A worker in a process where Grace asbestos-containing products were being installed, mixed, removed or cut by others
 (f) If other, please specify.

Pursuant to F.R.C.P. 33(d), please see attached Interrogatory Responses and W.R., Grace and Company EID documentation.

PART IV. INDIRECT EXPOSURE TO GRACE ASBESTOS-CONTAINING PRODUCTS

1. Are you asserting an injury caused by exposure to Grace asbestos-containing products through contact/proximity with another injured person? ☐ Yes ☒ No

If yes, complete questions 2 through 10 of this section for each injured person through which you allege exposure to Grace asbestos-containing products. For your convenience, additional copies of Part IV are attached as Appendix B to this Questionnaire.

2. Please indicate the following information regarding the other injured person:

Name of Other Injured Person:

Gender: ☐ Male ☐ Female

Last Four Digits of Social Security Number:

Birth Date:

3. What is your Relationship to Other Injured Person: ☐ Spouse ☐ Child ☐ Other

4. Nature of Other Injured Person's Exposure to Grace Asbestos-Containing Products

5. Dates Other Injured Person was Exposed to Graces Asbestos-Containing Products:

6. Other Injured Person's Basis for Identification of Asbestos-Containing Product as Grace Product

7. Has the Other Injured Person filed a lawsuit related to his/her exposure? ☐ Yes ☐ No

If yes, please provide caption, case number, file date, and court name for the lawsuit:

Caption:

Case Number:

File Date:

Court Name:

8. Nature of Your Own Exposure to Grace Asbestos-Containing Product:

9. Dates of Your Own Exposure to Grace Asbestos-Containing Product:

10. Your Basis for Identification of Asbestos-Containing Product as Grace Product:

[REMAINDER OF PAGE INTENTIONALLY BLANK]

PLEASE PRINT AND TYPE IN CAPITAL LETTERS. SHEETS CONTAINING OTHER INFORMATION ARE NOT TO BE USED.

Please complete the chart below for each party against which you have filed a lawsuit and/or claim alleging exposure to asbestos-containing products other than Grace products. If you filed such lawsuit and/or claims against multiple parties, the Court has ordered that you must complete a separate chart for each party. For your convenience, additional copies of Part V are included in Appendix F to this Questionnaire.

If exposure was in connection with your employment, use the list of occupation and industry codes in the instructions to Part III to indicate your occupation and the industry in which you worked.

In the "Nature of Exposure" column, for each job listed, please indicate the letter(s) corresponding to whether you were any of the following during your exposure:

- (a) A worker who personally mixed Grace asbestos-containing products
(b) A worker who personally removed or cut Grace asbestos-containing products
(c) A worker who personally installed, mixed, removed or cut by others
(d) A worker in a space where Grace asbestos-containing products were being installed, mixed, removed or cut by others
(e) If other, please specify.

Pursuant to F.R.C.P. 23(d), please see attached Interrogatory Responses and New W.R. Grace and Company P.D. documentation.

WR GRACE PIQ 38048-0017

PART VII: LITIGATION AND CLAIMS REGARDING ASBESTOS AND/OR SILICA

a. LITIGATION

1. Have you ever been a plaintiff in a lawsuit regarding asbestos or silica?..... ☒ Yes ☐ No

If yes, please complete the rest of this Part VII(a) for each lawsuit. For your convenience, additional copies of Part VII are attached as Appendix G to this Questionnaire

2. Please provide the caption, case number, file date, and court name for the lawsuit you filed

Caption: Per F.R.C.P. 33(d), Please See Attached Court Documents

Case Number: 311064

File Date: 3/28/2000

Court Name: Superior Court of the State of California

3. Was Grace a defendant in the lawsuit? ☒ Yes ☐ No

4. Was the lawsuit dismissed against any defendant? ☒ Yes ☐ No

If yes, please provide as the basis for dismissal of the lawsuit against each defendant:

Various, decided not to pursue at this time

5. Has a judgment or verdict been entered? ☐ Yes ☐ No

If yes, please indicate verdict amount for each defendant(s): _____

6. Was a settlement agreement reached in this lawsuit? ☐ Yes ☐ No

If yes and the settlement was reached on or after April 2, 2001, please indicate the following:

- a. Settlement amount for each defendant: _____ For #6 (a-d): Objection. The information sought is not relevant, is confidential, and in many instances, subject to confidentiality provisions permitting disclosure only by court order.
- b. Applicable defendants: _____
- c. Disease or condition alleged: _____
- d. Disease or condition settled (if different than disease or condition alleged): _____

7. Were you deposed in this lawsuit? ☒ Yes ☐ No

If yes and Grace was not a party in the lawsuit, please attach a copy of your deposition to this Questionnaire.

b. CLAIMS

1. Have you ever asserted a claim regarding asbestos and/or silica, including but not limited to a claim against an asbestos trust (other than a formal lawsuit in court)? ☒ Yes ☐ No

If yes, please complete the rest of this Part VII(b). If no, please skip to Part VIII. Per F.R.C.P. 33(d), Please See Attached Claim Summary

2. Date the claim was submitted: _____ / _____ / _____

3. Person or entity against whom the claim was submitted: _____

4. Description of claim: Claim for asbestos-related disease as explained above.

5. Was claim settled? For #5 through #7: Objection. The information sought is not relevant, is confidential, and in many instances, subject to confidentiality provisions permitting disclosure only by court order. Yes ☐ No ☐

6. Please indicate settlement amount: _____

7. Was the claim dismissed or otherwise disallowed or not honored? ☐ Yes ☐ No

If yes, provide the basis for dismissal of the claim: _____

PART VIII: CLAIMS BY DEPENDENTS OR RELATED PERSONS

Name of Dependent or Related Person:

REDACTED

Gender: ☒ Male ☐ Female

Last Four Digits of Social Security Number:

h Date: ____ / ____ / ____

Financially Dependent: ☐ Yes ☒ NoRelationship to Injured Party: ☐ Spouse ☒ Child ☐ Other If other, please specify _____

Mailing Address: 6507 Tudor Circle Brecksville, OH 44141

Daytime Telephone Number: _____ (____) _____

PART IX: SUPPORTING DOCUMENTATION

Please use the checklists below to indicate which documents you are submitting with this form.

Copies:

Novato, CA 94945

Re: **REDACTED**

Dear Mr. Greaney:

Please find enclosed my report on : had a 55.5 pack year history of cigarette smoking, having quit smoking in 1962 and a history of exposure to asbestos between 1942 and 1945 while working as an apprentice toolmaker for Schoenberger Broadway and in 1946 for 2-3 weeks while unloading a Naval ship in Japan. : was stated to have been possibly exposed to asbestos between 1948 and 1998 while working at other locations which are described in my report.

: was stated to have a past medical history of diabetes mellitus, hyperlipidemia, right knee arthroscopic surgery, bilateral cataract excisions, bilateral carpal tunnel syndrome, a past cholecystectomy and an anterior cervical spine procedure performed in 1996.

According to reports from the Cleveland Clinic, : presented with left flank pain and back pain and was found to have a metastatic lesion in the 12th thoracic vertebra. He was identified to have tumor involving his right 4th rib and right iliac crest. Radiographic studies also identified a right pleural effusion and a right pleural-based mass.

Biopsies were taken of the pleural mass and : was diagnosed at the Cleveland Clinic to have a malignant mesothelioma.

: received radiation therapy to the bone lesions involved by tumor. I am uncertain of his exact clinical course but he expired on June 24, 2000

We received the autopsy tissue from Pathology Support Services. The right lung was encased by a rind of tumor that had the features of a sarcomatoid/desmoplastic mesothelioma with some areas of epithelioid differentiation making the tumor biphasic with the predominant tumor being sarcomatoid and desmoplastic.

Some tissue we received had the appearance of hyaline pleural plaque which involved the parietal pleura. The plaque was characteristic of plaque caused by asbestos.

REDACTED

REDACTED

REDACTED

L00-372
Page 2 of 2

We performed asbestos digestion analysis on the lung tissue and that study showed 120, 465, 155, 135 and 490 asbestos bodies per gram of wet lung tissue in the left upper lobe, left lower lobe, right upper lobe, right middle lobe and right lower lobe, respectively.

Based on : history of occupational exposure, pleural plaque identified at autopsy and elevated numbers of asbestos bodies in digested lung tissue, I conclude his right pleural metastatic predominantly sarcomatoid/desmoplastic mesothelioma was caused by asbestos.

All opinions and conclusions in this letter and in my report are to a reasonable degree of medical certainty.

If you have any questions concerning my report, please let me know.

Sincerely,

Samuel P. Hammar, M.D.

REDACTED

REDACTED

REDACTED

Page 2 of 8

There is a death certificate stating [REDACTED] d sd on June 24, 2000 at age 73 from mesothelioma. He was also described as having diabetes mellitus and hyperlipidemia.

There is a report by James A. Robb, M.D., Miami, Florida, stating [REDACTED] had a history of shortness of breath and right chest pain with significant weight loss, right pleural effusion and right pleural nodularity. Radiologic studies of the chest, abdomen and pelvis were stated to show no primary malignant process.

There is a report by Barry R. Horn, M.D., dated September 29, 2000 stating he reviewed medical records and reports. On page 6 of his report, Dr. Horn diagnosed [REDACTED] to have malignant mesothelioma and diabetes mellitus. He stated [REDACTED] presented in the early part of 2000 with back pain and pain radiating in a radicular fashion. An MRI of the back was obtained which showed a metastatic lesion at T12. A chest radiograph showed a right pleural effusion with a mass in the chest. Bronchoscopy was performed and no diagnosis was made. Thoracentesis was performed and very atypical cells were identified consistent with malignant mesothelioma. Thoracoscopy was stated to have been performed and a biopsy was interpreted as showing mesothelioma. Dr. Horn's report states the diagnosis was confirmed by Dr. Joseph Tomashefski at MetroHealth Medical Center in Cleveland, Ohio. Tissue had been reviewed by Dr. James Robb who confirmed the diagnosis of mesothelioma. [REDACTED] subsequently was seen by several oncologists who recommended radiation therapy to the spine. Otherwise, it was recommended that he receive supportive care. Dr. Horn stated he did not know [REDACTED] current clinical status but stated [REDACTED] would die in the near future of complications due to the malignancy. Dr. Horn stated he was only provided a limited work history which represented responses to interrogatories. Dr. Horn stated the interrogatories stated [REDACTED] was assigned to the U.S.S. General Polk while it was at Hunter's Point Naval Shipyard in San Francisco from March to April 1945. He was below deck and did not recall being in the boiler room. Dr. Horn stated that simply being onboard ship exposed [REDACTED] to asbestos. In addition, in September 1945, [REDACTED] was onboard a liberty ship in Philadelphia doing welding. Again, he would have been exposed to asbestos simply being on board ship and it was possible [REDACTED] might have used asbestos containing cloth while welding. Dr. Horn stated that in 1946, [REDACTED] spent 2-3 weeks aboard the U.S.S. Admiral Mayo unloading naval ships and was again onboard ship. Dr. Horn stated the interrogatories indicated that from 1950 to 1951, [REDACTED] worked for Parker Hannifin Company doing inventory and may have been exposed to asbestos. From September 1951 to January 1982, he worked for Angel Nail in Chaplet doing payroll and may have been exposed to asbestos.

There is a report concerning [REDACTED] by David J. Adelstein, M.D., Cleveland Clinic Foundation, dated February 11, 2000 stating he was consulted by Dr. Dergham and Dr. Lane for advice and opinion regarding [REDACTED] who was a 73-year-old man with a recent diagnosis of malignant pleural mesothelioma. Dr. Adelstein stated [REDACTED] presented with progressive left flank and back pain and on evaluation by his primary care physician was found to have a destructive bony lesion at T12. [REDACTED] also had a large right pleural effusion identified by chest radiograph with evidence of either a parenchymal lung mass or pleural location on the right. Bone scan confirmed metastatic involvement at T12, the right 4th

ACCESSION NO. L00-372

REDACTED

Page 3 of 8

rib and the right iliac crest and an MRI of the scan demonstrated early conus compression and epidural extension of disease at the T₁₂ level with a second lesion at L₁. [REDACTED] was hospitalized and further evaluation was undertaken. He was begun on corticosteroids and was given radiation therapy to the spinal lesion. Thoracentesis was performed and there were probable malignant cells in the pleural fluid. Bronchoscopy was negative for tumor. On February 4, 2000, [REDACTED] underwent a thoracoscopy with pleural tumor biopsy that showed a biphasic malignant mesothelioma. The pathology was stated to have been reviewed by Dr. Joseph Tomaszewski at the Cleveland Metropolitan General Hospital who confirmed the diagnosis. Dr. Adelstein stated he was contacted with regard of possible treatment options. He stated that subjectively, [REDACTED] had right arm and right chest discomfort which developed after his thoracoscopy and was gradually improving. He gave no history of dyspnea or fevers. His past medical history was notable for type II diabetes mellitus and he had a remote Bell's Palsy, hyperlipidemia, cervical spine surgery and a history of peripheral neuropathy. He had an allergy to Penicillin. His family history was negative for malignancy and his review of systems was otherwise noncontributory. History was stated to be notable in that [REDACTED] stopped smoking 37 years ago, previously smoking 1-2 packs a day for 17 years (17-34 pack years). He was stated to have been married, lived with his wife and drank alcohol modestly. This report states there was no clear asbestos exposure. On physical exam, he was an elderly white male in no acute distress. He had a healing thoracoscopy scar on the right and lungs revealed minimal dullness at the right base. They were otherwise clear. The heart was normal without murmurs, gallops or rubs. The abdomen was benign. Dr. Adelstein stated he had a chance to review the x-rays and agreed with the interpretations. Spinal involvement appeared to be distinct and separate from the pleural fluid and the right lung mass appeared to be contiguous with the pleura and he presumed it represented pleural ingrowth of tumor. The assessment was that of malignant mesothelioma. Dr. Adelstein stated that the behavior was somewhat atypical in finding distant spread to bone with a destructive process involving T₁₂ [My note: I think bone involvement in mesothelioma is much more common than people realize, especially with desmoplastic mesothelioma]. Dr. Adelstein stated he discussed the disease with the patient and his family and suggested that they complete the radiation therapy and then refer [REDACTED] for palliative care.

There is a radiation oncology consultation report by Dr. Kenneth C. Lane, M.D., Cleveland Clinic Foundation, dated February 2, 2000 which gives a history similar to that of Dr. Adelstein. This report starts out by stating [REDACTED] had metastatic stage 4 bronchogenic carcinoma. The report states [REDACTED] had no first degree relatives with a history of cancer. The report states [REDACTED] had a past medical/surgical history of type II diabetes mellitus, status-post right knee arthroscopy years ago, bilateral cataract excision, bilateral carpal tunnel syndrome, past cholecystectomy and an anterior cervical spine procedure on March 6, 1996. He also had a history of Bell's Palsy involving the left side of his face 9 years ago with complete recovery and a history of a urinary tract infection in 1999 which resolved. He underwent colonoscopy in 1999 and a small benign polyp was removed. The social history report of Dr. Lane's report states that [REDACTED] was a retired accountant and worked at least part time with the TOFPS Grocery Chain.

REDACTED

ACCESSION NO. L00-372

Samuel P. Hammar, M.D., F.C.C.P., F.C.A.P., Director Keith O. Hallman, M.D. David M. Bray, M.D. Richard A. Cox, M.D.

REDACTED*Page 4 of 8*

There is a pathology report from the Cleveland Clinic Foundation, accession number S00-7501 that stated a right pleural tissue biopsy showed a biphasic malignant mesothelioma with sarcomatoid and epithelioid features. The neoplastic cells were stated to be strongly positive for CAM5.2 keratin and negative for CEA and LeuM1. Pleural fluid was stated to show atypical mesothelial cells.

A pathology report designated S00-583 from the Marymount Hospital, accession date February 1, 2000 stated that a right pleural biopsy showed malignant mesothelioma, biphasic type, predominantly sarcomatous, involving the parietal pleura. A right pleural fluid cell block showed markedly atypical mesothelial cells consistent with malignant mesothelioma.

Another pathology report from the Marymount Hospital in Garfield Heights, Ohio, accession number S00-643, accession date February 4, 2000, stated that right pleural tissue designated 1, 2 and 3 showed an abnormal spindle cell neoplasm with a differential diagnosis of fibrous mesothelioma vs. sarcomatoid carcinoma. The final diagnosis listed was: Open biopsy, right pleura: Malignant mesothelioma, biphasic (predominantly sarcomatous) involving parietal pleura. This diagnosis was rendered after Dr. Tomaszewski made his diagnosis.

There is another pathology report from the Marymount Hospital in Garfield Heights, Ohio, cytology accession number PF00-18, accession date 02/01/2000 stating that pleural fluid contained atypical mesothelial cells consistent with malignant mesothelioma.

Gross description:

The right and left lungs are connected to each other with some mediastinal tissue. The right lung is partially encased by a rind of greyish-white tumor that macroscopically resembles mesothelioma. There also are two pieces of tissue composed mostly of a tumor rind with some associated small amount of lung tissue. This appears to have come from the right lung.

The left lung macroscopically appears contracted. Fixed, it weighs 391 grams and measures about 22 x 15 x 10 cm. The visceral pleural surface is generally smooth with a moderate amount of anthracotic pigment deposition. On sectioning, the parenchyma is brownish-red and shows no emphysema. The lower lobe is more consolidated than the left upper lobe. No primary or metastatic tumor is observed in the lung. Representative sections of the left upper lobe submitted in cassettes 1, 2 and 3. Representative sections from the left lower lobe are submitted in cassettes 4, 5 and 6. A 5-gram sample of left upper and left lower lobe are submitted for asbestos digestion analysis.

There are separate pieces of tumor rind that appear to encase the right lung and measure up to about 15 x 15 x 2 cm. in greatest dimension. Representative sections through these rinds of tumor are submitted in cassettes 7 and 8.

The remaining right lung specimen consists of the right lung, mediastinal tissue, the upper trachea, portion of the aorta and attached pleura. The attached parietal pleura showed focal

REDACTED

**REDACTED***Page 5 of 8*

hyaline pleural plaques characteristic of plaques caused by asbestos. Representative sections of plaques are submitted in cassette 9.

The right lung specimen measures about 22 x 20 x 12 cm. and weighs 1,000 grams. It is cut from the top to the bottom at about 1.5 cm. intervals. The remaining specimen shows a rim of tumor on the medial surface measuring up to about 1½ cm. in maximum dimension. The appearance is most suggestive of mesothelioma. There is focal invasion into the mediastinal tissue with involvement of lymph nodes. A section through a lymph node involved by tumor is submitted in cassette 10. Representative sections of the right upper lobe region and tumor are submitted in cassettes 11, 12 and 13. Representative sections of the right middle lobe region and tumor are submitted in cassettes 14, 15 and 16. Representative sections of the right lower lobe and tumor are submitted in cassettes 17, 18 and 19. A 5-gram sample from the right upper lobe, right middle lobe and right lower lobe are submitted for asbestos digestion analysis.

Microscopic description:

Sections of the left upper lobe show mild congestion with areas of focal visceral pleural fibrosis with carbonaceous dust deposits. The alveolar septal capillaries are mildly dilated. There are dust deposits around small bronchi and bronchioles with a slight increase in collagenous tissue. There is dense eosinophilic material within alveolar spaces that could be edema fluid or surfactant. No corpora amylacea are observed.

Sections of the left lower lobe show similar changes with slightly more congestion and edema with postmortem growth of bacteria. There are carbonaceous dust deposits around small bronchi and bronchioles. There is focal fibrin on the surface of one of the sections and there is compressive atelectasis of the tissue.

Sections of separate pieces of tissue that had the appearance of tumor submitted in cassettes 7 and 8 show the tumor to be composed predominantly of spindle cells associated with abundant extracellular collagenous tissue. There is an interfasciculating type of pattern. There is involvement of the subparietal pleural fat. The histologic appearance of these slides is most suggestive of a sarcomatoid mesothelioma.

Sections through the diaphragm show thin but classic hyaline pleural plaques caused by asbestos. These are sometimes associated with chronic inflammation.

Sections through a lymph node macroscopically involved by tumor shows it to be extensively replaced by tumor. There is a moderate amount of carbonaceous dust in the lymph node. Most of the lymph node is replaced by a sarcomatoid tumor. In this slide, I do not see a biphasic component.

Sections of the right upper lobe region and tumor show a predominantly sarcomatoid tumor in association with reactive changes associated with tumor. The tumor is directly penetrating the lung. The lung parenchyma on the right shows congestion and edema. Sections of the right middle lobe region show the same changes. The tumor is directly invading the lung and much of it has a desmoplastic pattern, being very hypocellular. This tumor would probably

ACCESSION NO. **L00-372****REDACTED**

Samuel P. Hammar, M.D., F.C.C.P., F.C.A.P., Director Keith O. Hallman, M.D. David M. Bray, M.D. Richard A. Cox, M.D.

**REDACTED***Page 6 of 8*

classify as a desmoplastic mesothelioma, since a significant percentage of it (maybe up to 50%) is composed of dense hypocellular collagenous tissue. There are deposits of carbonaceous dust in association with fibrous tissue around small bronchi and bronchioles. There are some areas in slide 15 in which the tumor has a somewhat more epithelioid appearance. The tumor is invading into the lung.

Sections through the right lower lobe show the same type of changes with invasion into the subparietal pleural fat and chest wall skeletal muscle. Most of tumor is sarcomatoid/desmoplastic.

Iron stains on sections from blocks 2, 5, 12, 14 and 17 show no asbestos bodies.

Asbestos Digestion Analysis: Five 5-gram samples of peripheral lung tissue are cut into small pieces and completely digested in commercial bleach. After complete digestion the bleach is carefully decanted and the sediment at the bottom of the container is carefully extracted with equal volumes of chloroform and 50% ethyl alcohol. This solution is transferred to a test tube, shaken vigorously, and centrifuged at 1200 rpm for ten minutes. After removal of as much carbonaceous material as possible, the solution is recentrifuged and the sediment at the bottom of the test tube is extracted in 95% alcohol and passed through a Millipore filter of 0.5 micrometer diameter pore size. Asbestos bodies on the filter are then counted. Results are as follows:

Left upper lobe =	120	asbestos bodies/gram wet lung tissue
Left lower lobe =	465	asbestos bodies/gram wet lung tissue
Right upper lobe =	155	asbestos bodies/gram wet lung tissue
Right middle lobe =	135	asbestos bodies/gram wet lung tissue
Right lower lobe =	490	asbestos bodies/gram wet lung tissue

Comment: In our laboratory, persons with no history of exposure to asbestos have between 0-20 asbestos bodies per gram of wet lung tissue.

WR GRACE PIQ 38046-0083

REDACTED

Page 7 of 8

The following summary statements can be made in this case:

1. [REDACTED] was a 73-year-old man at the time of his death on June 24, 2000. [REDACTED] was stated to have a history of 55.5 pack years of cigarette smoking, having quit smoking in 1982. [REDACTED] was stated to have been exposed to asbestos between 1942 and 1945 while working as an apprentice toolmaker at Schoenberger Broadway. He may have also been exposed to asbestos for 2-3 weeks in 1946 while unloading naval ships in Japan and between 1948 and 1998 while working at various locations as described in my report.
2. [REDACTED] was stated to have had a past medical history of diabetes mellitus, hyperlipidemia, right arthroscopic knee surgery, bilateral cataract excisions, bilateral carpal tunnel syndrome, a cholecystectomy and an anterior cervical spine procedure in 1996.
3. Report by Dr. Barry R. Horn stated [REDACTED] presented in the early part of 2000 with back pain radiating in a radicular fashion. He was found to have a metastatic lesion in the 12th thoracic vertebra. Chest radiograph was stated to have shown a right pleural effusion with a mass in the chest.
4. Bronchoscopy was performed and no diagnosis was made. Thoracentesis was performed and atypical cells were stated to have been identified consistent with malignant mesothelioma.
5. Tissue specimens were stated to have been reviewed by Dr. Robb who diagnosed mesothelioma.
6. Dr. Horn opined [REDACTED] had mesothelioma and that despite therapy, he would expire as a result of mesothelioma. Dr. Horn stated [REDACTED] had been exposed to asbestos while being on board the ships and while unloading a ship for 2-3 weeks in 1946.
7. A report by Dr. David J. Adelstein concerning [REDACTED] dated February 11, 2000 stated [REDACTED] was a 73-year-old man who had been recently diagnosed to have pleural mesothelioma. Dr. Adelstein stated [REDACTED] presented with progressive left back pain and was found to have a destructive bony lesion at T₁₂ and a large right pleural effusion and a parenchymal lung mass or a mass of pleural origin.
8. The report by Dr. Adelstein from the Cleveland Clinic stated a bone scan confirmed metastatic involvement of T₁₂ with involvement of the right 4th rib and right iliac crest. There was stated to have been compression of the conus by epidural extension of the tumor.
9. [REDACTED] was treated with corticosteroids and radiation. The assessment by Dr. Adelstein was that of malignant mesothelioma that was behaving in a somewhat atypical finding since there was destructive bone metastases. I pointed out that it was not uncommon for desmoplastic mesotheliomas to metastasize to bone and compress the spine.
10. Radiation oncology report by Dr. Kenneth C. Lane of the Cleveland Clinic dated February 2, 2000 stated [REDACTED] had metastatic stage 4 bronchogenic carcinoma. (This statement is incorrect). Dr. Lane stated [REDACTED] had a past medical history of Bell's palsy of the left side 9 years ago with complete recovery and a history of a urinary tract infection in 1999 which resolved. [REDACTED] had undergone colonoscopy in 1999 and a small benign polyp was removed.

RE: REDACTED

Dear Mr. Brayton:

Thank you for referring the case of _____ for my evaluation. At your request, I have reviewed medical records.

Report of Dr. James Robb dated June 12, 2000. He reviewed tissue from the Cleveland Clinic which demonstrated a right pleural malignancy which invaded the connective tissue of the parietal pleura and the chest wall. It had a solid epithelial pattern and a sarcomatous pattern. Immunohistochemistry was reviewed. CEA, B72.3 and LeuM1 were negative. Keratin and Calretinin were positive. A diagnosis of mesothelioma was made.

Records of the Cleveland Clinic. _____ was seen on August 2, 1989. He complained of some dizziness.

He was seen on February 11, 2000 by Dr. David Adelstein. _____ was recently diagnosed with mesothelioma. He presented with progressive left flank and back pain. An evaluation was done by his primary care physician. He was found to have a destructive bony lesion at T12. He had a large right pleural effusion seen on x-ray. Bone scan confirmed metastatic involvement at T12. He was begun on steroids and radiation for the spinal lesion. A thoracentesis was performed which revealed probable malignant cells. Bronchoscopy was negative. Thoracoscopy was performed. He was diagnosed as having biphasic malignant mesothelioma. The tissue was reviewed at Cleveland Metropolitan General Hospital where the diagnosis was confirmed.

He had a history of type 2 diabetes mellitus. He had a remote history of Bell's palsy. He had hyperlipidemia. He had a history of cervical spine surgery in the past and had a history of a peripheral neuropathy. He stopped smoking 37 years previously. He smoked one to two packs of cigarettes per day for 17 years. There was "no clear asbestos exposure." On examination, there was minimal dullness at the right base. Cardiac examination was normal. There were no masses. X-rays were reviewed. There was definite spinal involvement. The right lung mass was contiguous with

REDACTED

REDACTED

Mr. Alan Brayton
September 29, 2000

RE:

REDACTED

the pleura. A diagnosis of mesothelioma was made. Palliation was recommended. Systemic chemotherapy was not recommended.

I have reviewed a pathology report dated February 12, 2000. Tissue from Marymount Hospital was reviewed. A diagnosis of malignant mesothelioma was made. Keratin was positive. CEA and LeuM1 stains were negative.

I have reviewed a note by Dr. Bachar Derghan, an oncologist, dated March 21, 2000. He saw Mr. [REDACTED] in early March at Marymount Hospital. At that time, he was diagnosed with malignant mesothelioma. He had bony metastases involving T12, L1 and epidural involvement at T12. He received radiotherapy to the metastatic lesion. He was being seen to discuss further management regarding his disease. His appetite and level of activity improved. He was started on Ritalin and Megace. He continued to have right shoulder and right arm weakness. On physical examination, his respiratory rate was 24/minute. Pulse was 84/minute. Blood pressure was 136/84. He weighed 164 pounds. There were diminished breath sounds at the right base. Cardiac examination demonstrated grade 3/6 systolic ejection murmur. Dr. Derghan concluded that chemotherapy had no role.

[REDACTED] was seen on April 7, 2000. He was on Percocet, glyburide, Reglan, Megace, Ritalin, Colace and Decadron. He was sleeping well. His appetite was better. He had no nausea or vomiting. His weight was stable at 73.3 kg. There was a slight reduction of breath sounds in the right chest. There was no cyanosis, clubbing or edema. The dose of Ritalin was increased.

Records of Marymount Hospital in Garfield Heights, Ohio. A bone scan was done on January 19, 2000. There was increased activity in the T12 vertebra, right fourth rib and right iliac crest suspicious for metastatic disease.

A chest x-ray was obtained on January 21, 2000. There was a 2 cm ill-defined mass in the right mid lung laterally which increased in size since January 28, 1998. There was a moderate amount of pleural fluid on the right which was new. The mediastinum was unremarkable. The left lung was clear.

An MRI of the thoracic and lumbar spine were done on January 27, 2000. There was abnormal low signal intensity involving the left side of the T12 body and involving the pedicle and facet. There was a moderate amount of epidural extension. The lesion at T12 measured about 4 cm. There was a small focus within the mid portion of the L1 body suspicious for metastatic disease. A portable chest film was obtained on January 27, 2000. There was a right pleural effusion and a right mid lung nodule.

REDACTED

Mr. Alan Brayton
September 29, 2000
Page 3

RE:

A CT scan of the head was obtained on January 27, 2000. There was no evidence of metastatic disease.

I have reviewed a chest x-ray report dated January 27, 2000. There was a right pleural fluid collection in the lower half of the right chest. There was a soft tissue density in the right mid lung zone consistent with a known mass.

I have reviewed a note by Dr. David Weiner dated January 31, 2000. had a history of smoking one and a half to two packs of cigarettes per day for 45 years. He stopped smoking five years previously. He complained of shortness of breath and left sided pain along approximately T12. He was seen by Dr. Rosenthal and had a questionable right lung mass and a pleural effusion. A thoracentesis showed suspicious cells. Bronchoscopy was performed. No diagnosis was made. An MRI of the lower thoracic spine and upper lumbar spine was obtained. It showed epidural invasion by tumor and the beginning of spinal cord progression. He was being admitted to the hospital to receive intravenous Decadron to prevent him from becoming paraplegic. He complained of mild dyspnea. Respiratory rate was 22-24 per minute. Heart rate was 80/minute. He was afebrile. There was dullness to percussion over the right chest posteriorly. There was no cyanosis, clubbing or edema. There was slight fullness of the flank region on the left side. He was diagnosed as having epidural compression secondary to tumor invading the T12 epidural space with possible spinal cord involvement. There was metastatic cancer to bone. He had a right pleural effusion and a right lung nodule. Pleural biopsy was recommended.

Chest films were obtained on January 31, 2000. There was a large right pleural effusion with an increased amount when compared to the x-ray obtained on January 27, 2000. Cardiomegaly was seen.

Chest films were obtained on February 1, 2000. There was a moderate residual right pleural effusion.

I have reviewed a note dated February 1, 2000 by Dr. Dale Brann. was referred because of a mass involving a thoracic spine. He complained of low back pain. He worked in payroll. He had a significant history of smoking in the past. He stopped 20 to 30 years ago. He had a left facial palsy which was at least 10 years old due to Bell's palsy. Motor and sensory examination was normal. MRI showed tumor invasion of the left T12 vertebral body and the left pedicle and the epidural space.

I have reviewed a note dated February 1, 2000 by Dr. Edward Rosenthal. was 73 years of age. He complained of left lower quadrant abdominal pain. A CT scan of the abdomen and pelvis showed what was thought to be an osteolytic lesion of the right iliac wing. A bone scan

REDACTED

REDACTED

Mr. Alan Brayton
September 29, 2000
Page 4

RE:

REDACTED

revealed uptake in this area of T12 and the ribs. A chest x-ray showed a mass and a right pleural effusion. He had a 10 pound weight loss. He denied having any cough, chest pain or fever.

With regard to his past medical history, he had type 2 diabetes. He had hyperlipidemia. He had a history of cervical spine surgery. He had osteoarthritis. He had peripheral neuropathy involving his feet. He was on Darvocet, Lipitor and glyburide. On examination, his blood pressure was 150/70. Respiratory rate was 16/minute. Pulse was 70/minute. The lungs were clear. There were distant breath sounds. There were no sensory defects. He had possible metastatic disease. The etiology of the tumor was not clear. Neurosurgical and oncologic workup was recommended.

I have reviewed a cytology report dated February 1, 2000 from right pleural fluid. Atypical mesothelial cells were seen consistent with mesothelioma.

Chest x-rays were obtained on February 3, 2000. There was a small to moderate right pleural effusion. There was thickening of the lower and lateral aspect of the right hemithorax. There was a 2 cm mass density overlying the lateral aspect of the right mid lung on the PA view. This was not seen on the lateral view.

I have reviewed a surgical pathology report dated February 4, 2000. A right pleural biopsy was done. A diagnosis of malignant mesothelioma was made. It was biphasic. The tissue had been sent to the Metro Health Medical Center as well.

I have reviewed a pathology report from Metro Health Medical Center in Cleveland. A diagnosis of biphasic malignant mesothelioma was made by Dr. Joseph Tomashefski. Keratin and Calretinin stains were positive. CEA was positive in rare tumor cells. B72.3 and LeuM1 were negative.

A portable chest film was obtained on February 5, 2000. A right chest tube was present. There was no pneumothorax. There was increased density in the mid and lower lung zone on the right which appeared to be pleural based. There was mild blunting of the left costophrenic angle. The left lung was otherwise clear.

A portable chest film was obtained on February 6, 2000. There was a right chest tube in place. There was moderate residual pleural fluid on the right. There was nodular thickening of the pleura adjacent to the parenchyma. The left lung was clear. The heart size was normal.

A portable chest film was obtained on February 8, 2000. The right chest tube was removed. There were pleural changes along the lower right lateral chest wall. The left lateral costophrenic angle was now better visualized.

Mr. Alan Brayton
September 29, 2000
Page 5

RE: REDACTED

I have reviewed a note by Dr. Eli Briones dated February 21, 2000. was 73 years of age. He had right upper arm pain for two to three weeks since the lung biopsy. The arm hurt with any movement. It was actually getting a little bit better. He denied any alcohol use or smoking. He was on glyburide and Decadron. Blood pressure was 110/70. Pulse was 97. Respirations were 20/minute. There were diminished breath sounds in the chest. Cardiac examination was normal. He had a full range of motion at the right upper extremity. He had no point tenderness. X-rays of the right humerus showed only degenerative joint disease.

Review of Interrogatories. was born on June 30, 1926. He served in the Army from July 1944 to May 1946. He served at Camp Benjamin Harrison in Indiana. He served at Camp Robertson in Arkansas from January 1945 to March 1945 for infantry training. He served at Camp Stewart in Georgia from August 1944 to December 1944 for training. He was at Fort Ord from March 26 to April 25, 1945. He served on board various ships in the Philippines and in Japan. He had a history of smoking cigarettes from April 1945 to April 1962. He smoked about one and a half packs of cigarettes per day. He smoked Lucky Strike and Kent cigarettes.

His work history is provided. From May 1942 to June 1943, he worked for Schoenberger Broadway in Cleveland. He made tools on the lathe for industrial machinery. He was unaware of exposure to asbestos. From August 1943 to May 1944 he worked for Empire Plow in Cleveland. He worked part time as a laborer. He was unaware of asbestos exposure. He was in the U.S. Army at Fort Ord for three weeks in 1944 and was unaware of asbestos exposure. He was at the Hunter's Point Naval Shipyard from March to April of 1945. He was billeted on the General John Pope. He was below deck. He was not in the boiler room. He was in the Philippines for two weeks in September 1945 on board a Liberty ship. He performed welding. From December 1945 to April 1946 he was on board the U.S.S. Admiral Mayo for two to three weeks. He recalled unloading Naval ships in Japan during the occupation.

From 1948 to 1950, he worked for American Fork & Hoe in Cleveland. He was in the mailroom and the tax department as a clerk. He was unaware of asbestos exposure. From 1950 to 1951, he worked for Parker Appliance in Cleveland. The company was also known as Parker Hannifin Company. He may have been exposed to asbestos. From 1951 to 1982, he worked for Angel Nail & Chaplet in Cuyahoga Heights, Ohio. He conducted payroll duties and physical inventory in the factory. The conditions were extremely dusty and dirty. He may have been exposed to asbestos.

From March, 1982 to March 1998 he worked for A.W. Fenton in Brookpark, Ohio. He did payroll duties and physical inventory within a warehouse. He performed inventory every year within the entire warehouse. The conditions were extremely dusty and dirty. He was unaware of asbestos exposure. In late 1999 he was a grocery bagger for Topps.

REDACTED

RE: REDACTED

Diagnoses

1. Malignant mesothelioma.
2. Diabetes mellitus.

Discussion

presented early this year complaining of back pain with pain radiating in a radicular fashion. An MRI of his back was obtained which demonstrated a metastatic lesion at T12. A chest x-ray demonstrated a right pleural effusion along with a mass in the chest. Bronchoscopy was performed. No diagnosis was made. A thoracentesis was performed. Very atypical cells were identified consistent with mesothelioma. Subsequently, thoracoscopy was performed. The biopsy was interpreted locally as demonstrating mesothelioma. The diagnosis was confirmed by Dr. Joseph Tomashefski at Metro Health Medical Center in Cleveland. The tissue has also been reviewed by Dr. James Robb who confirms the diagnosis of mesothelioma. He subsequently was seen by several oncologists who recommended radiation therapy to the spine. Otherwise, it was recommended that he receive supportive care. I do not know what current clinical status is. He will die in the near future of complications of this malignancy.

There is only one known cause of malignant mesothelioma in man and that is prior asbestos exposure or exposure to a similar substance called zeolite. This relationship was clearly identified in 1960. Since then, many epidemiologic studies have clearly demonstrated that workers exposed to asbestos are at risk for this otherwise rare malignancy.

I have been provided with a limited work history. It is really only in the interrogatories. The interrogatories indicate that [REDACTED] was assigned to the U.S.S. General John Pope while it was the Hunter's Point Naval Shipyard in San Francisco from March to April of 1945. He was below deck. He did not recall being in the boiler room. Simply being on board ship exposed him to asbestos. In addition, in September 1945 he was on board a Liberty ship in the Philippines doing welding. Again, he would have been exposed to asbestos simply being on board ship and is possible that he might have used cloth while welding. In 1946, he spent two to three weeks on board the U.S.S. Admiral Mayo unloading Naval ships. He was again on board ship.

The interrogatories also indicate that from 1950 to 1951, he worked for the Parker Hannifin Company doing inventory and may have been exposed to asbestos. The interrogatories do not indicate how he may have been exposed to asbestos.

Mr. Alan Brayton
September 29, 2000
Page 7

RE: REDACTED

From September 1951 to January 1982 he worked for Angel Nail & Chaplet doing payroll and inventory and may have also been exposed to asbestos.

I obviously need a more complete work history.

In summary, [REDACTED] has been diagnosed as having mesothelioma invading bone. He clearly does not have a curable disease and will die in the near future of complications of this malignancy. It was caused by prior occupational exposure to asbestos.

Thank you for referring this case for my evaluation.

Sincerely,

Barry R. Horn, M.D.

9 6. Decedent received his four-year degree from David Meyers College, formerly
10 Dyka & Spencerian & Case Western Reserve. Decedent studied advanced tax courses.

11 7. The first date of service of the summons and complaint was March 31, 2000. This
12 was amended to include the wrongful death action on November 7, 2000.

13 8. No.

14 9. Decedent served in the U.S. Army from July 1944 to May 1946. Decedent served
15 at Camp Benjamin, Harrison, Indiana. Decedent served at Camp Robertson, Arkansas, from
16 January 1945 to March 1945, for infantry training. Decedent served at Camp Stewart, Georgia,
17 from August 1944 to December 1944, for training. Decedent served at Fort Ord, Monterey from
18 March 26 - April 25, 1945. Decedent recalled being on board various ships which were being
19 serviced at Harbor Legaspi, Philippines, and Yokohama, Japan. Decedent received an Honorable
20 Discharge.

21 10. Excluding plaintiff's expert consultants, plaintiff is able to identify the following
22 doctors:

23 a. Dr. Edward Rosenthal.

24 b. 4630 Richmond Road, Cleveland, OH 44128.

25 c. General health care.

26 d. Approximately 1996 to June 26, 2000. Plaintiff's investigation and
27 discovery are continuing.

28 e. General health care.

1 f. Plaintiff has provided authorizations for the release of medical records to
2 Berry & Berry. Defendants may obtain copies of medical records through Berry & Berry.

- 3
4 a. Dr. Weiner.
5 b. 12000 McCracken, Garfield Heights, Ohio 44125.
6 c. Decedent underwent Pulmonary exams.
7 d. Approximately January 2000 to June 26, 2000.
8 e. Mesothelioma.

9 f. Plaintiff has provided authorizations for the release of medical records to
10 Berry & Berry. Defendants may obtain copies of medical records through Berry & Berry.

- 11
12 a. Dr. Julio Popovsky.
13 b. 12000 McCracken, Garfield Heights, OH 44125.
14 c. Decedent underwent Thoracic surgery.
15 d. Approximately January 2000.
16 e. Decedent had Mesothelioma.

17 f. Plaintiff has provided authorizations for the release of medical records to
18 Berry & Berry. Defendants may obtain copies of medical records through Berry & Berry.

- 19
20 a. Dr. Bachar Dergham.
21 b. 6100 West Creek Road, Independence, Ohio 44131.
22 c. Decedent received treatment for Mesothelioma.
23 d. Approximately January 2000 to June 26, 2000.
24 e. Decedent had Mesothelioma.
25 f. Plaintiff has provided authorizations for the release of medical records to

26 Berry & Berry. Defendants may obtain copies of medical records through Berry & Berry.

27 Decedent or his records may have been examined by plaintiff's attorney's
28 consultants; the results of said examination(s), including experts, writings and consultant work

1 product are protected under the attorney work product doctrine and attorney/client privilege.
2 Discoverable reports and writings of plaintiff's expert witnesses shall be provided to all parties
3 when such experts are ascertained within the time frame set forth under C.C.P. Section 2034
4 and/or any general orders governing this litigation.

5 11. Excluding those used by plaintiff's expert consultants, plaintiff is able to
6 recall the following hospitals:

- 7 a. Meridia Hillcrest.
- 8 b. Mayfield, Ohio.
- 9 c. Decedent underwent neck surgery. X-rays were taken.
- 10 d. Approximately March 1996.
- 11 e. Decedent required neck surgery due to herniated cervical disc injury and
12 spinal sepsis. Plaintiff's investigation and discovery are continuing.

13 f. Plaintiff has provided authorizations for the release of medical records to
14 Berry & Berry. Defendants may obtain copies of medical records through Berry & Berry.

- 15
- 16 a. Marymount Hospital.
- 17 b. 12300 McCracken, Garfield Heights, Ohio 44125.
- 18 c. Decedent underwent gall bladder surgery and received treatment for
19 Mesothelioma. Chest and abdominal x-rays were taken and a lung biopsy was performed.
- 20 d. Approximately 1997 to March 2000.
- 21 e. Decedent was suffering from abdominal pain and breathing difficulty.

22 Decedent required gall bladder surgery and treatment for mesothelioma.

23 f. Plaintiff has provided authorizations for the release of medical records to
24 Berry & Berry. Defendants may obtain copies of medical records through Berry & Berry.

25 12. Excluding any taken by plaintiff's expert consultants, plaintiff is able to recall the
26 following x-rays: Marymount Hospital, 12300 McCracken, Garfield Heights, Ohio 44125..

27 Please see response to Interrogatory Nos. 10 and 11, above. Plaintiff's investigation and
28 discovery are continuing.

1 13. Excluding any taken by plaintiff's expert consultants, plaintiff is able to recall that
2 decedent had pulmonary function tests performed by Dr. Weiner, 12000 McCracken, Garfield
3 Heights, OH 44125, between approximately January 2000 and June 26, 2000. Please see
4 response to Interrogatory Nos. 10 and 11, above. Plaintiff's investigation and discovery are
5 continuing.

6 14. Plaintiff defers to decedent's medical records as the best source of information
7 responsive to this interrogatory. Plaintiff's investigation and discovery are continuing.

8 15. Yes. Plaintiff will make these documents available. Plaintiff believes that Berry
9 & Berry has copies of the documents, via authorizations, from prior action.

10 16. a-f, i. Due to the debilitating effects of decedent's asbestos-related disease,
11 plaintiff contends that decedent's entire body had become adversely affected by his exposure to
12 asbestos and asbestos-containing products. Decedent's symptoms became increasingly more
13 aggravated. They included shortness of breath, wheezing, diminished strength, fatigue, weight
14 loss, a reduction of activities and mobility. The onset of these symptoms was so gradual that it is
15 not possible to identify a specific date. However, plaintiff believes that the symptoms began
16 around December 1999.

17 g. Plaintiff contends that decedent lost time from work as a result of his
18 asbestos-related condition at Tops, 1225 W. Pleasant Valley, Parma, Ohio.

19 h. Not applicable.

20 17. Decedent was diagnosed with mesothelioma on or about February 2000.

21 18. No.

22 19. a. Yes.

23 b. Ohio Department of Health.

24 c. 1740 Tanhollow Trail, Broadview Heights, Ohio 44147.

25 d. Wife.

26 e. Edward Rosenthal, MD; 4630 Richmond Road, #270, Warrensville, Ohio
27 44128.

28 f. Mesothelioma.

- 1 g. 11:00 a.m.; June 24, 2000; Parma Community General Hospital, Parma,
2 Ohio.
- 3 20. No formal autopsy was performed, but the lungs were removed and preserved.
- 4 21. Yes. Decedent underwent a lung biopsy at Marymount Hospital, 12300
5 McCracken, Garfield Heights, Ohio 44125, in approximately February 2000. Slides were made
6 at this facility.
- 7 22. Yes.
- 8 a. During the 1950s, decedent was involved in an auto accident where
9 decedent was rear-ended.
- 10 b. Decedent received damage to his back and disc.
- 11 c. Decedent was unable to recall. Plaintiff's investigation and discovery are
12 continuing.
- 13 d. None.
- 14 e. Plaintiff currently does not have any documents responsive to this
15 interrogatory. Plaintiff's investigation and discovery are continuing.
- 16 23. Yes.
- 17 a. Approximately April 1945-April 1962.
- 18 b. Decedent smoked cigarettes. Decedent inhaled cigarette smoke.
- 19 c. Decedent smoked approximately zero to one and a half packs per day.
- 20 d. Decedent smoked approximately zero to one and a half packs per day.
- 21 e. Decedent smoked Lucky Strike and Kent.
- 22 f. Yes.
- 23 1. Dr. William Kleinman.
- 24 2. Approximately 1960.
- 25 24. Yes.
- 26 a.
- 27 b. 1926-1964. **REDACTED**
- 28 c. Lucky Strike, daily.

1 d. All day.

2 25. Decedent consumed alcoholic beverages occasionally.

3 26. Plaintiff currently recalls the following employers of decedent:

4	5	6	7	8
	<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
6	Schoenberger, Broadway & Harvard Avenue, Cleveland, OH	Schoenberger, Broadway & Harvard Avenue, Cleveland, OH	Tool Maker	May 1942- June 1943

8 Job Duties: Decedent recalled making tools on a lathe for industrial machinery. Decedent recalled the following co-worker: Charlie Tarkanian address unknown. Plaintiff is currently unaware if decedent was exposed to asbestos during this employment.

10	11	12	13	14
	<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
12	Empire Plow, 3140 East 65, Cleveland, OH	Empire Plow, 3140 East 65, Cleveland, OH	Laborer	Aug. 1943- May 1944

13 Job Duties: Decedent recalled working part-time in a factory as a laborer. Decedent recalled the following co-worker: Ernie Zachowski address unknown. Plaintiff is currently unaware if decedent was exposed to asbestos during this employment.

15	16	17	18	19
	<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
17	U.S. Army	Fort Ord, Monterey, CA	Private First Class, Rifleman	1944 (for 2-3 weeks)

18 Job Duties: Decedent recalled being stationed at Fort Ord, Monterey, California for just a few weeks. Plaintiff is currently unaware decedent was exposed to asbestos during this time of service.

20	21	22	23	24
	<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
22	U.S. Army	Hunters Point Naval Shipyard, San Francisco, CA	Private First Class, Rifleman	Mar. 1945, Apr. 1945
23		<u>GENERAL JOHN POPE (AP-125)</u>		

24 Job Duties: Decedent recalled being onboard the GENERAL JOHN POPE (AP-125). Decedent recalled being below deck, but does not remember the boiler room or people specifically working around him. Plaintiff currently contends that decedent may have been exposed to asbestos during this service.

27 ///

28 ///

<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
U.S. Army	Philippines, aboard a Liberty ship.	Private First Class, Rifleman	Approx. 2 weeks in Sept. 1945

Job Duties: Decedent recalled performing welding aboard a Liberty ship. Decedent currently contends that decedent may have been exposed to asbestos during this service.

<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
U.S. Army	Port Company, Yokohama, Japan <u>ADMIRAL MAYO (AP-110)</u>	Private First Class, Rifleman	Dec. 1945-Apr. 1946

Decedent recalled unloading navy oil ships in Japan during the occupation of Japan. Plaintiff currently contends that decedent may have been exposed to asbestos during this time of service.

<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
American Fork & Hoe, n.k.a. True Temper, Cleveland, OH	American Fork & Hoe, n.k.a. True Temper, Cleveland, OH	Clerk	1948-1950

Job Duties: Decedent recalled working for this employer beginning as a mail room clerk and advancing to the tax department. Decedent recalled the following co-worker: John Kilinski, 13107 Grannis, Garfield Heights, Ohio. Plaintiff is currently unaware if decedent was exposed to asbestos during this employment.

<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
Parker Appliance Company, n.k.a. Parker Hannifin, 17325 Euclid Avenue, Cleveland, OH	Parker Appliance Company, n.k.a. Parker Hannifin, 17325 Euclid Avenue, Cleveland, OH	Inventory Clerk	1950-1951

Job Duties: Decedent recalled doing numerous inventory tasks within the Parker Hannifin Company, formerly known as Parker Appliance Company. Decedent recalled the following co-worker: Bob Farr, address unknown. Plaintiff currently contends that decedent may have been exposed to asbestos during this employment.

<u>Employer</u>	<u>Location of Exposure</u>	<u>Job Title</u>	<u>Exposure Dates</u>
Angel Nail & Chaplet Company, 4580 East 71, Cuyahoga Heights, OH	Angel Nail & Chaplet Company, 4580 East 71, Cuyahoga Heights, OH	Inventory Clerk	Sept. 1951-Jan. 1982

1 Job Duties: Decedent recalled conducting payroll duties and physical inventory in the factory.
 2 Decedent recalled performing inventory every year throughout the entire factory. Decedent
 3 recalled extremely dusty and dirty conditions within the factory. Decedent recalled the following
 4 co-workers: George Miller, 2206 Pebble Brook, Westlake, Ohio 44145 and Joe Woods, 32407
 5 Hamilton Court #103, Solon, Ohio 44139. Plaintiff currently contends that decedent may have
 6 been exposed to asbestos during this employment.

Employer	Location of Exposure	Job Title	Exposure Dates
A.W. Fenton, 6565 Eastland Road, Brook Park, OH	A.W. Fenton, 6565 Eastland Road, Brook Park, OH	Inventory Clerk	Mar. 1982- Mar. 1998

8 Job Duties: Decedent recalled conducting payroll duties and physical inventory within the
 9 warehouse. Decedent recalled performing inventory every year throughout the entire warehouse.
 10 Decedent recalled extremely dusty and dirty conditions within the warehouse. Plaintiff is
 11 currently unaware if decedent was exposed to asbestos during this employment.

Employer	Location of Exposure	Job Title	Exposure Dates
Topps, 1225 West Pleasant Valley Road, Parma, OH	Topps, 1225 West Pleasant Valley Road, Parma, OH	Grocery Clerk	Aug. 1999- Dec. 1999

14 Job Duties: Decedent recalled working in a grocery store as a bagger for this employment.
 15 Plaintiff is currently unaware if decedent was exposed to asbestos during this employment.

16 OTHER EXPOSURE:

17 In 1954, decedent built the addition to his house at 4810 East 86th Street, Garfield, Ohio.
 18 Decedent recalled breaking through insulation with his foot and being exposed to a white
 19 powdery substance. Decedent recalled that in 1958, many homes were being built around the
 20 area of his home and building materials were left outside, next door and across the street from his
 21 home. Decedent recalled in 1966, remodeling the basement of his home and transforming it into
 22 a recreation room. Decedent recalled his brother-in-law, Frank Gudin, now deceased, helped
 23 and assisted him in the remodeling of his basement. Decedent recalled adding electrical wiring
 24 to the remodel of decedent's basement. Decedent recalled insulating pipes with asbestos in the
 25 remodeling of his basement. Decedent recalled constructing the flooring of the basement with
 26 12" x 12" vinyl asbestos tiles. Decedent recalled using plasterboard, sheetrock, and joint
 27 compound. Decedent recalled products from GEORGIA PACIFIC. Decedent recalled
 28 purchasing supplies for the remodel of his basement from 84 LUMBER in Brookpark, Ohio, and
 29 FORREST CITY ENTERPRISES in Cleveland, Ohio. Plaintiff currently contends that decedent
 30 may have been exposed to asbestos during this remodel of his basement.

31 Decedent recalled in 1980, there was a fire in the basement of his home and contractors had to
 32 come in and rip-out everything creating dust. Plaintiff currently contends that decedent may
 33 have been exposed to asbestos during this rip-out.

34 The following shipyards represent construction and/or repair yards for the above listed ships on
 35 which plaintiff worked: Bethlehem Steel, Alameda, CA; Bethlehem Steel, San Francisco, CA;
 36 Federal Shipbuilding & Drydock, Kearny, NJ; General Engineering & Drydock, Alameda, CA.

37 Plaintiff's discovery and investigation are continuing.

- 1 27. Yes.
- 2 a. Tops, 1225 West Pleasant Valley. Decedent did not recall the local
- 3 number. Plaintiff's investigation and discovery are continuing.
- 4 b. Decedent did not recall the exact dates when he maintained membership.
- 5 Plaintiff's investigation and discovery are continuing.
- 6 28. Decedent first learned that exposure to asbestos was a potential health hazard
- 7 during the 1970s via the news media.
- 8 29. Decedent did not observe the use of safety precautions.
- 9 30. Decedent never observed the use of safety precautions.
- 10 31. No.
- 11 32. Yes.
- 12 a. Decedent was exposed to rolled insulation in the rooms, attic, floors,
- 13 ceilings, and walls in his home, and installation of drywall for a bedroom addition.
- 14 b. Approximately 1953 or early 1954.
- 15 c. Decedent cut rolled asbestos insulation with scissors and sanded joint
- 16 compound. Plaintiff's investigation and discovery are continuing.
- 17 d. Decedent recalled rolled insulation and joint compound. Plaintiff's
- 18 investigation and discovery are continuing.
- 19 33. Yes. Decedent left Tops, 1225 W. Pleasant Valley, Parma, Ohio, in December
- 20 1999 due to mesothelioma.
- 21 34. Please see Interrogatory No. 33, above.
- 22 35. No.
- 23 36. 1999: \$2,844
- 24 1998: \$8,976
- 25 1997-1989: approximately \$22,000-23,000 per year. Plaintiff's investigation
- 26 and discovery are continuing.
- 27 37. No.
- 28 38. Yes. Plaintiff is currently in the process of obtaining information responsive to

1 this request.

2 39. Yes. Plaintiff is currently in the process of obtaining information responsive to
3 this request.

4 40. AARP United Health Care, Post Office Box 13999, Philadelphia, Pennsylvania
5 19187 and Medicare paid for some of said expenses. Plaintiff's investigation and discovery are
6 continuing.

7 41. Decedent gave a deposition in his personal injury case for asbestos on June 8,
8 2000 and June 9, 2000. The deposition was transcribed by Cady & Wanous Court Reporters.
9 Plaintiff's investigation and discovery are continuing.

10 42. No.

11 43. No.

12 44. Yes. Decedent filed a personal injury case for a back injury in Cuyahoga County,
13 Ohio. Back problems remain, no judgment was obtained. On March 28, 2000, decedent filed a
14 personal injury case for his asbestos-related injury in San Francisco Superior Court, Case No.
15 311064. The case was filed with Brayton♦Purcell, 222 Rush Landing Road, Novato, California,
16 94945-2469. The case was amended to include this wrongful death action.

17 45. Please refer to No.44, above.

18 46. Yes. Settlements have previously been received from the following defendants:
19 A.P. GREEN INDUSTRIES, INC.; COMBUSTION ENGINEERING, INC.; E.J. BARTELLS
20 COMPANY; THE FLINTKOTE COMPANY; LAKE ASBESTOS OF QUEBEC, LTD.;
21 MANVILL CORPORATION ASBESTOS DISEASE COMPENSATION FUND; J.T. THORPE
22 & SON, INC.; and UNIROYAL, INC. for a total of \$65, 358.90. Plaintiff's share are to be
23 determined.
